

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

Ref. 13000000397

This Safety Data Sheet adheres to the standards and regulatory requirements of the Republic of Ireland and may not meet the regulatory requirements of other countries.

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name	:	BIPLAY [®] SX [®]
Synonyms	:	B11645302 DPX-CDQ73 33SG

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture : Herbicide

1.3. Details of the supplier of the safety data sheet

Company	: Du Pont (UK) Limited Wedgwood Way Stevenage, Herts. SG1 4QN United Kingdom			
Telephone	: +44 (0) 1438 734 000			
E-mail address	: sds-support@che.dupont.com			
1.4. Emergency telephone number				
Emergency telephone number	 +(353)-19014670 Poison Centres may only possess information required for products in accordance with Regulation (EC) No 1272/2008 and national legislation. 			

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

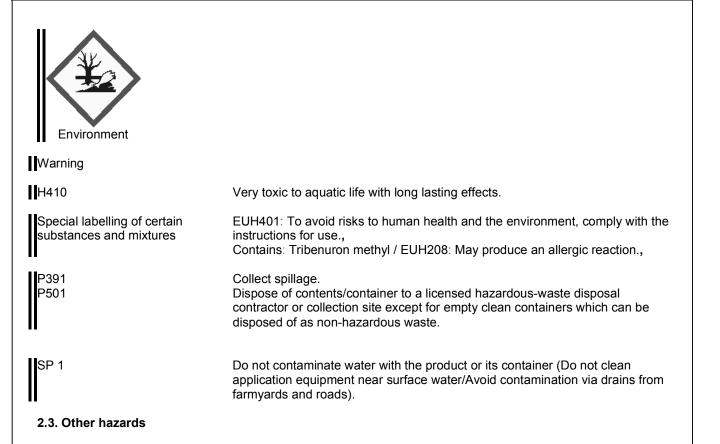

Acute aquatic toxicity, Category 1 Chronic aquatic toxicity, Category 1	H400: Very toxic to aquatic life. H410: Very toxic to aquatic life with long lasting effects.
Dangerous for the environment	R50/53: Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
2.2. Label elements	

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

Ref. 13000000397

This mixture contains no substance considered to be persistent, bioaccumulating and toxic (PBT). This mixture contains no substance considered to be very persistent and very bioaccumulating (vPvB).

SECTION 3: Composition/information on ingredients

3.1. Substances

Not applicable

3.2. Mixtures

Registration number	Classification	Classification according to	Concentration
	according to	Regulation (EU) 1272/2008	(% w/w)
	Directive 67/548/EEC	(CLP)	

Tribenuron methyl (CAS-No.101200-48-0) (EC-No.401-190-1) (M-Factor: 100IAcutel 100IChronicl)

R43	Skin Sens. 1; H317	22.2 %

Eye Ir	t. 2; H319 >= 1 - < 5 %
--------	-------------------------

The above products are REACH compliant; Registration number(s) may not be provided because substance(s) are exempted, not yet registered under REACH or are registered under another regulatory process (biocide uses, plant protection products), etc.

For the full text of the R-phrases mentioned in this Section, see Section 16. For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

General advice	 Never give anything by mouth to an unconscious person. For specialist advice contact the National Poisons Information Service. Healthcare Professionals: (01) 809 2566 or (01) 837 9964 (24h per day – 365 days per year). Public Poisons Information Line: (01) 809 2166 (8am-10pm). 	
Inhalation	Move to fresh air. Consult a physician after significant exposure. Artificial respiration and/or oxygen may be necessary.	
Skin contact	Take off contaminated clothing and shoes immediately. Wash off immediately with soap and plenty of water. In the case of skin irritation or allergic reactions see a physician. Wash contaminated clothing before re-use.	
Eye contact	If easy to do, remove contact lens, if worn. Hold eye open and rinse slowly and gently with water for 15-20 minutes. If eye irritation persists, consult a specialist.	
Ingestion	Obtain medical attention. DO NOT induce vomiting unless directed to do so by a physician or poison control center. If victim is conscious: Rinse mouth with water.	
4.2. Most important symptoms and effects, both acute and delayed		
Symptoms	No cases of human intoxication are known and the symptoms of experimental	
	3/15	

BIPLAY[®] SX[®] Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014 Ref. 13000000397 intoxication are not known. 4.3. Indication of any immediate medical attention and special treatment needed Treatment Treat symptomatically. SECTION 5: Firefighting measures 5.1. Extinguishing media Suitable extinguishing media : Water spray, Foam, Dry chemical, Carbon dioxide (CO2) Extinguishing media which : High volume water jet, (contamination risk) shall not be used for safety reasons 5.2. Special hazards arising from the substance or mixture Specific hazards during : Hazardous combustion products Carbon dioxide (CO2) Nitrogen oxides (NOx) firefighting 5.3. Advice for firefighters Special protective equipment : Wear full protective clothing and self-contained breathing apparatus. for firefighters Further information : Prevent fire extinguishing water from contaminating surface water or the ground water system. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. (on small fires) If area is heavily exposed to fire and if conditions permit, let fire : burn itself out since water may increase the area contaminated. Cool containers/tanks with water spray. SECTION 6: Accidental release measures 6.1. Personal precautions, protective equipment and emergency procedures Personal precautions : Control access to area. Avoid dust formation. Avoid breathing dust. Use personal protective equipment. Refer to protective measures listed in sections 7 and 8.

6.2. Environmental precautions

Environmental precautions	: Prevent further leakage or spillage if safe to do so. Use appropriate container to avoid environmental contamination. Do not flush into surface water or sanitary sewer system. Do not allow material to contaminate ground water system. Local authorities should be advised if significant spillages cannot be contained. If the spill area is porous, the contaminated material must be collected for subsequent treatment or disposal. If the product contaminates rivers and lakes or drains inform respective authorities.
	4/15

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

Ref. 13000000397

6.3. Methods and materials for containment and cleaning up

Methods for cleaning up	 Clean-up methods - small spillage Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean-up methods - large spillage Avoid dust formation. Contain spillage, pick up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal according to local regulations (see section 13). If spill area is on ground near valuable plants or trees, remove 5 cm of top soil after initial clean-up.
Other information	 Never return spills in original containers for re-use. Dispose of in accordance with local regulations.

6.4. Reference to other sections

For personal protection see section 8., For disposal instructions see section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Advice on protection against fire and explosion	:	the working solution as given on the label(s) and/or the user instructions. Use prepared working solution as soon as possible - Do not store. Provide appropriate exhaust ventilation at places where dust is formed. Wash hands before breaks and immediately after handling the product. Remove and wash contaminated clothing before re-use. Avoid exceeding the given occupational exposure limits (see section 8). Keep away from heat and sources of ignition. Avoid dust formation in confined areas. During processing, dust may form explosive mixture in air.	
7.2. Conditions for safe storage, including any incompatibilities			
Requirements for storage areas and containers	:	Store in a place accessible by authorized persons only. Store in original container. Keep in properly labelled containers. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.	
Further information on storage conditions	:	Do not allow product to become wet during storage.	
Advice on common storage	:	No special restrictions on storage with other products.	
Storage temperature	:	< 35 °C	
Other data	:	Stable under recommended storage conditions.	
7.3. Specific end use(s)			
5/15			

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

Ref. 13000000397

Plant protection products subject to Regulation (EC) No 1107/2009.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

If sub-section is empty then no values are applicable.

Components with workplace control parameters

Type Form of exposure	Control parameters	Update	Basis	Remarks

Sucrose (CAS-No. 57-50-1)

TWA	10 mg/m3	2010	ELV (IE)
TEL	20 mg/m3	2010	ELV (IE)

8.2. Exposure controls

Engineering measures	:	Contains no substances with occupational exposure limit values.
		Ensure adequate ventilation, especially in confined areas. Provide for appropriate exhaust ventilation and dust collection at machinery.
Eye protection	:	Safety glasses with side-shields conforming to EN166
Hand protection	:	Material: Nitrile rubber Glove thickness: 0.3 mm Glove length: Standard glove type. Protection index: Class 6 Wearing time: > 480 min The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The suitability for a specific workplace should be discussed with the producers of the protective gloves. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough. Gauntlets shorter than 35 cm long shall be worn under the combination sleeve. Before removing gloves clean them with soap and water.
Skin and body protection	:	Manufacturing and processing work: Full protective clothing Type 5 (EN 13982- 2)
		Mixer and loaders must wear: Rubber apron Full protective clothing Type 5 + 6 (EN ISO 13982-2 / EN 13034) Nitrile rubber boots (EN 13832-3 / EN ISO 20345).
		6/15

Form	: extruded granules
CTION 9: Physical and che 9.1. Information on basic	mical properties physical and chemical properties
	Backpack / knapsack sprayer: Half mask with a particle filter FFP1 (EN149)
	Tractor / sprayer without hood: Half mask with a particle filter FFP1 (EN149)
	Spray application - outdoor: Tractor / sprayer with hood: No personal respirato protective equipment normally required.
	Mixer and loaders must wear: Half mask with a particle filter FFP1 (EN149)
Respiratory protection	: Manufacturing and processing work: Half mask with a particle filter FFP1 (EN149)
	cleaning of equipment, work area and clothing. Keep working clothes separately. Contaminated work clothing should not be allowed out of the workplace. For environmental protection remove and wash all contaminated protective equipment before re-use. Remove clothing/PPE immediately if material gets inside. Wash thoroughly and put on clean clothing. Dispose of rinse water in accordance with local and national regulations. Wash hands before breaks and at the end of workday.
Protective measures Hygiene measures	 The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. All chemical protective clothing should be visually inspected prior to use. Clothing and gloves should be replaced in case of chemical or physical damage or if contaminated. Only protected handlers may be in the area during application. Handle in accordance with good industrial hygiene and safety practice. Regula
	when wearing some fabrics. Take advice from supplier. Garment materials that are resistant to both water vapour and air will maximis wearing comfort. Materials should be robust to maintain the integrity and barrie in use. The permeation resistance of the fabric must be verified independently of the type » protection recommended, to ensure an appropriate performance level of the material adequate to the corresponding agent and type of exposure.
	To optimize the ergonomy it may be recommended to use cotton underwear
	Backpack / knapsack sprayer: Full protective clothing Type 4 (EN 14605) Nitri rubber boots (EN 13832-3 / EN ISO 20345).
	Tractor / sprayer without hood: Full protective clothing Type 6 (EN 13034) Nitr rubber boots (EN 13832-3 / EN ISO 20345).
	protection normally required.

Sensitisation

Guinea pig Maximisation Test (GPMT) Result: Animal test did not cause sensitization by skin contact. Method: OECD Test Guideline 406 (Data on the product itself) Information source: Internal study report

Repeated dose toxicity

Tribenuron methyl

The following effects occurred at levels of exposure that significantly exceed those expected under labeled usage conditions.

Oral - feed Mouse Exposure time: 90 d NOAEL: 500 mg/kg Reduced body weight gain

Oral Rat Exposure time: 28 d Reduced body weight gain

 Metsulfuron methyl The following effects occurred at levels of exposure that significantly exceed those expected under labeled usage conditions.

Oral Rat Exposure time: 90 d Reduced body weight gain, Liver effects

Dermal Rabbit Exposure time: 21 d NOAEL: 125 mg/kg Drying of skin, Cracking of skin, Skin irritation

Oral Rat Reduced body weight gain, Organ weight changes, Liver

Dermal Rabbit Skin irritation

Mutagenicity assessment

- Tribenuron methyl Animal testing did not show any mutagenic effects. Tests on bacterial or mammalian cell cultures did not show mutagenic effects.
- Metsulfuron methyl

Animal testing did not show any mutagenic effects. Did not cause genetic damage in cultured bacterial cells. Genetic damage in cultured mammalian cells was observed in some laboratory tests but not in others.

Carcinogenicity assessment

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

Ref. 13000000397

- Tribenuron methyl Not classifiable as a human carcinogen. An increased incidence of tumours was observed in laboratory animals. Target(s): Mammary glands
- Metsulfuron methyl Not classifiable as a human carcinogen. Did not show carcinogenic effects in animal experiments.

Toxicity to reproduction assessment

- Tribenuron methyl
 No toxicity to reproduction
- Metsulfuron methyl No toxicity to reproduction Animal testing did not show any effects on fertility.

Assessment teratogenicity

- Metsulfuron methyl
 Animal testing showed no developmental toxicity.
- STOT single exposure
- The substance or mixture is not classified as specific target organ toxicant, single exposure.

STOT - repeated exposure

The substance or mixture is not classified as specific target organ toxicant, repeated exposure.

Aspiration hazard

The mixture does not have properties associated with aspiration hazard potential.

SECTION 12: Ecological information

12.1. Toxicity

Toxicity to fish

static test / LC50 / 96 h / Oncorhynchus mykiss (rainbow trout): > 120 mg/l Method: OECD Test Guideline 203 (Data on the product itself) Information source: Internal study report

Toxicity to aquatic plants

ErC50 / 72 h / Pseudokirchneriella subcapitata (microalgae): 0.0213 mg/l Method: OECD Test Guideline 201 (Data on the product itself) Information source: Internal study report Toxicity to aquatic invertebrates

static test / EC50 / 48 h / Daphnia magna (Water flea): > 120 mg/l Method: OECD Test Guideline 202

11/15

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

(Data on the product itself) Information source: Internal study report

Toxicity to soil dwelling organisms

LC50 / 14 d / Eisenia fetida (earthworms): > 1,000 mg/kg Method: OECD Test Guideline 207 (Data on the product itself) Information source: Internal study report

Toxicity to other organisms

LD50 / 48 h / Apis mellifera (bees): > 0.110 mg/kg Method: OECD Test Guideline 213 Oral (Data on the product itself) Information source: Internal study report

LD50 / 48 h / Apis mellifera (bees): > 0.100 mg/kg Method: OECD Test Guideline 214 Contact (Data on the product itself) Information source: Internal study report

Chronic toxicity to fish

- Tribenuron methyl NOEC / 21 d / Oncorhynchus mykiss (rainbow trout): > 560 mg/l
- Metsulfuron methyl NOEC / 21 h / Oncorhynchus mykiss (rainbow trout): 68 mg/l

Chronic toxicity to aquatic Invertebrates

- Tribenuron methyl NOEC / 21 d / Daphnia magna (Water flea): 120 mg/l
- Metsulfuron methyl NOEC / 21 h / Daphnia magna (Water flea): 100 mg/l

12.2. Persistence and degradability

Biodegradability

Not readily biodegradable. Estimation based on data obtained on active ingredient.

12.3. Bioaccumulative potential

Bioaccumulation

Does not bioaccumulate. Estimation based on data obtained on active ingredient.

12.4. Mobility in soil

Mobility in soil

Under actual use conditions, there is no reasonable expectation of any movement of the product from the top soil layer.

BIPLAY[®] SX[®]

Version 4.0 (replaces: Version 3.2) Revision Date 11.12.2014

Ref. 13000000397

12.5. Results of PBT and vPvB assessment

PBT and vPvB assessment

This mixture contains no substance considered to be persistent, bioaccumulating and toxic (PBT). / This mixture contains no substance considered to be very persistent and very bioaccumulating (vPvB).

12.6. Other adverse effects

Additional ecological information

No other ecological effects to be specially mentioned See product label for additional application instructions relating to environmental precautions.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Product	suitable	dance with local and national regulations. Must be incinerated in a incineration plant holding a permit delivered by the competent es. Do not contaminate ponds, waterways or ditches with chemical or ntainer.		
Contaminated packaging		e-use empty containers.
